Esperance, WA, 6450

PROFILE

Kate joined Farmanco in 2025 and is based in the Esperance office.

Prior to joining the team, Kate spent five seasons in research agronomy, managing a diverse range of broadacre cropping projects across the wheatbelt regions of WA.

At Farmanco, Kate works across a broad suite of projects and collaborates closely with growers and industry partners to deliver clear, data driven insights that support improved farm performance and practical decision making.

AREAS OF EXPERTISE

- Project management across multi site, multi season research programs
- Field trial design, coordination and statistical analysis
- Technical reporting across industry bodies
- Economic interpretation of research outcomes, linking agronomy results to farm level profitability
- Project extension and communication, including field days, presentations and written summaries
- Grower and stakeholder engagement, including communicating research outcomes in clear, practical language.
